Egis Bceom International has been working continuously in Mozambique since 2000 delivering projects in the Transport and Water Sectors. We now have a permanent presence in the country which allows us to closely coordinate our work on the ground which has covered many provinces. Our presence also means that we are able to stay in close contact with our clients including Government departments, agencies and local offices of the funding agencies such as the European Commission, World Bank and the African Development Bank.

Egis Bceom International has a global presence with offices across Europe, Asia, North and South America, Africa and the Pacific. Through its regional representation Egis Bceom International is able to bring its expertise and resources directly to its clients, wherever they are based. Each local office has in-depth knowledge and understanding of local conditions and practices, and with additional backing from the global resources of the Egis group, Egis Bceom International is able to offer world class quality services worldwide.

### Staff and Resources:

Egis Bceom International employs expatriate and Mozambican engineers and has a policy of knowledge transfer to local staff. Staff are well trained and equipped with modern facilities including state of the art computer software and hardware. A senior experienced Egis Bceom International professional is assigned to co-ordinate back-stopping and home office support related to technical and contractual matters throughout the project period.
